STOCKING UPDATE AS OF 03/18/2026:

Winter is gradually on its way out and spring trout stocking is here! While winter treated us well and we were able to stock almost 60,000 trout through the ice, longer days and warmer weather have us excited for the spring season. The Fisheries Division plans to stock roughly 500,000 trout between March and May. Brook Trout, Brown Trout, Rainbow Trout, and Tiger Trout are all scheduled. The majority of the trout will range between 10-12", and close to 25% are >12", some much larger! Please get out and enjoy. These fish are for you!

"The Daily Cast" – Elevated flows from the rain earlier this week are on the descending limb of the hydrograph and rivers and streams are looking good. We will be stocking moving water tomorrow and Friday. Next week the weather looks stable as well so we are in business! Should be a big week ahead. As always, use caution when navigating streambanks this time of year and keep tabs on flows in your favorite waterbody using the USGS stream gauges.

March 1 marked the beginning of the statewide catch and release season for trout with a few exceptions. All trout must be released without avoidable injury from March 1 until 6:00 am on the second Saturday of April (April 11th this year). *Exceptions include Trout Management Lakes where the daily limit is 1 trout/day (minimum length varies by lake), Sea Run Trout streams where the daily limit is 2 trout/day (15" minimum length), and waters with the designation "Tidal Waters and Tributaries". Delayed mortality from poor release techniques is real. To ensure best chance of survival for released fish, please consider using tactics like single barbless hooks, wet hands before taking pictures, minimize air exposure, cut the line for deeply hooked fish, avoid touching the gills or dragging the fish on land.

The following is a list of waters planned to be stocked by the Fisheries Division during spring 2026. Dates will be added daily to the "Stocked" column in the table below as locations are stocked and any relevant details will be noted in the "Daily Cast" section above. Anglers should also check out our **Interactive Stocking map** for location information. Please note that due to a variety of conditions not every river/stream stocking location can be stocked on each stocking run. The information is sorted alphabetically by waterbody name first in table 1 and by town name in table 2. Questions about CT DEEP's trout and salmon stocking may be sent to matthew.devine@ct.gov

Management type abbreviations: **TMA = Trout Management Area; TML = Trout Management Lake; TTA = Trophy Trout Area; Trout Park; WTMA = Wild Trout Management Area; CFW = Community Fishing Waters**
